Professional Summary

Motivated Computer Science student and full-stack developer with strong interest in building real-world platforms, coding systems, and student-focused products. Experienced in web development, system design, and UI engineering with a focus on performance, scalability, and clean user experience. Passionate about problem-solving, content creation, and building tools that help learners grow.

Technical Skills

Languages: Python, Java, JavaScript, SQL, C/C++ (basic)

Web: HTML, CSS, Tailwind CSS, React (basic), Flask, Django, Node.js

Databases: SQLite, MySQL

Tools: Git, GitHub, VS Code, Linux, Postman, Figma (basic)

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, System Design (beginner), REST APIs

Projects

CampusCode (Coding Platform) Designed and developed a student-focused coding platform that supports contests, problem management, reporting, and role-based dashboards (college admin, faculty, student).

- Built modular dashboards with Tailwind CSS and JavaScript.
- Implemented reporting system with Excel and PDF exports.
- Designed database models for users, contests, and problems.
- Focused on scalable structure and real-world academic workflows.

Streaky (Habit & Content Tracking App) Created a personal productivity system to track habits, daily routines, and YouTube content performance.

- Developed backend logic for habit tracking and statistics.
- Integrated analytics-style dashboards.
- Designed user-friendly UI for consistency and long-term use.

Online Voting System Full-stack web application supporting admin, voter, and candidate roles.

- Implemented authentication and role-based access control.
- Designed election management and vote-counting workflows.

Experience

Independent Developer / Student Projects

2024 – Present

Working on multiple real-world inspired platforms, focusing on full product development lifecycle.

- Designed, developed, tested, and iterated complete web systems.
- Practiced system design, database modeling, and UI/UX planning.
- Created reusable components and scalable folder structures.

Education

Bachelor of Technology in Computer Science

Meerut Institute of Technology

Expected: 2027

Relevant Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering

Achievements & Activities

- Founder of the CampusCode project initiative.
- Active content creator on YouTube focused on coding and self-growth.
- Built multiple full-stack applications independently.
- Regularly practice DSA and competitive programming problems.

Additional Information

Interests: System design, startup-style product building, UI engineering, teaching beginners, productivity systems.

Availability: Open to internships, freelance projects, and research-based learning opportunities.
